

REMARKS:

This amendment is for the purpose of amending the Title in the original application while retaining the amended claims in Amendment A. Applicants failed to amend the title in Amendment A thus necessitating this amendment B of even date.

The Official Action suggests that the title be amended to read "A Method of Making a Thermal Management for a Circuit Board Panel." Accordingly, Applicants have so amended the title as kindly suggested by the Examiner and therefore believe that the title is now fully descriptive and that the objection thereto has been overcome. Applicants respectfully request reconsideration of the title and allowance of the claims remaining in this application.

Applicants are appreciative of the art made of record and not relied upon as kindly provided by the Examiner.

Applicants have amended the title as kindly suggested by the Examiner to overcome the Examiner's objection thereto thereby placing this application in condition for allowance. Thus, claims 1 - 20 remain in this application and Applicants respectfully request reconsideration and allowance thereof.

In view of the above, an Action on the merits of this application, as amended, and an allowance thereof is respectfully requested.
